

## BRAIN BUILDER – Where does our food come from?

**Sent out:** Thursday 29<sup>th</sup> February 2024

**Due back:** Thursday 21<sup>st</sup> March 2024

In geography this term, we are investigating where food comes from. Your brain builder project should link to this. Suggestions of what you could do are listed below.

- Create a food diary of the things you eat, using the packaging to record where your food comes from.
- Keep track of the foods you eat over a period of time and plot this onto a world map.
- Create a factfile on one particular food. Where does it come from? What impact does its production have on our environment?
- Create a factfile on one particular country. Which foods come from there? How are they produced? Is it sustainable?
- Research fairtrade and create a factfile or poster about your findings.
